

FOAM IN PLACE

your choice in packaging

PACKAGING TECHNOLOGY FOR
SMART BUSINESS

Smart Bagger

IntelliPack foam-in-place systems are designed for operator convenience. Multiple options are available that meet small, medium and large application needs. Whether the requirement is protective void fill, blocking and bracing or cushioning, users can be confident that the product packaged is optimally protected during the entire shipping and handling process.

- ✓ **Ergonomic design:** Safer, more comfortable operation
- ✓ **Flip door design** offers easy-to-thread film with quick access to nip rolls.
- ✓ **Long lasting mixing module** fast & easy to clean and change.
- ✓ **90 degree spindle** feature ensures that film is loaded the proper way
- ✓ **User-friendly,** intuitive control panel – simple, instinctive to navigate

Easy to use

Operator selects proper bag size and foam amount.

Operator places bag inside box and places object on top of foam cushion

Foam cushion cover placed on top of product, box sealed

Final packaged product

Smart Shot

IntelliPack's SmartSHOT™ is our standard handheld, foam in place packaging system designed for small, medium and large applications that require protective void fill, blocking and bracing, and cushioning during the shipping and handling process.

- ✓ **Tapered dispenser**
Greater access and more precise dispensing
- ✓ **Heated dispenser minimises cold-shots**
Create the optimal environment for consistent foam performance.
- ✓ **Long lasting mixing module** fast & easy to clean and change.
- ✓ **Zero maintenance** expense, parts are included with equipment lease at no additional cost
- ✓ **Insulated handle stays cool**
Maximum comfort and safety for users
- ✓ **Special mounting plate**
Flexible mounting options

Smart Mold

Wood mold custom built to produce the ideal cushion shape

Film placed in mold, foam dispensed

Final product fits perfectly into the pre-molded foam cushion

Supplies

IntelliPack systems are specifically engineered to work with our family of consumables, SmartFOAM™, SmartLUBE™ and SmartFILM™. Together, they achieve a total packaging solution that provides customers with superior product protection.

IntelliPack SmartFOAM™ A/B Liquid Foam

	1050 litre totes	210 litre drums *60 litre drums available
A-Liquid foam	1,134 kgs	227 kgs
B-Liquid foam	1,043 kgs	204 kgs
Features	<ul style="list-style-type: none"> • Clear outer container colour allows user to visually see foam consumption • Inline and barrel pump options available with state-of-the-art brushless motors and controls to run longer. No additional components required. 	

IntelliPack Liquid Foam System

SLD	Super low-density (SLD) foam provides average cushioning and material recovery. SLD is a high performance replacement for loose fill, kraft paper, air bags, cellulose wadding or newspaper.
HE	High-efficiency (HE) foam provides good, initial cushioning and fair protection after multiple drops for medium to heavy products (10-30 kg). HE is a preferred alternative for all flexible protective packaging.
MLD	Moldable foam (MLD) provides flexible cushioning and excellent recovery for fragile or heavy products (20-55 kg) after multiple drops. MLD foam is an excellent replacement for all flexible protective packaging. Pads may be reused.
HD	Provides excellent recovery for medium to heavy (25-70 kg) products, even after multiple drops. An excellent replacement for all flexible protective packaging. Pads may be reused.
FLX	Flexible foam (FLX) provides excellent recovery for medium to heavy products (25-70 kg), even after multiple drops. FLX foam is an excellent replacement for all flexible protective packaging. Pads may be reused.
